Biomass and maintenance functions
Alternate Carbon Metabolism
Purine and Pyrimidine Biosynthesis
Nucleotide Salvage Pathway
Inorganic Ion Transport and Metabolism
Cofactor and Prosthetic Group Biosynthesis
Transport, Inner Membrane
Methionine Metabolism
tRNA Charging
Nitrogen Metabolism
Methylglyoxal Metabolism
Valine, Leucine, and Isoleucine Metabolism
Murein Recycling
Membrane Lipid Metabolism
Glutamate Metabolism
Glyoxylate Metabolism
Folate Metabolism
Pentose Phosphate Pathway
Glycolysis/Gluconeogenesis
Cell Envelope Biosynthesis
Arginine and Proline Metabolism
Tyrosine, Tryptophan, and Phenylalanine Metabolism
Cysteine Metabolism
Glycerophospholipid Metabolism
Histidine Metabolism
Alanine and Aspartate Metabolism
Oxidative Phosphorylation
Unassigned
Anaplerotic Reactions
Pyruvate Metabolism
Citric Acid Cycle
Lipopolysaccharide Biosynthesis / Recycling
Glycine and Serine Metabolism
Threonine and Lysine Metabolism
Oxidative Phosphorylation
Glycerophospholipid Metabolism
Anaplerotic Reactions
Cofactor and Prosthetic Group Biosynthesis
Inorganic Ion Transport and Metabolism
Glutamate Metabolism
Alanine and Aspartate Metabolism
Arginine and Proline Metabolism
